Founded in 1950, Harbin University of Science and Technology (HUST) is a comprehensive multidisciplinary university, featuring engineering as its lead subject. Honored as “the Cradle of Modern Engineers”, the university has been providing high quality education for experts in the sphere of technology. Numerous engineers have graduated from HUST and found employment in various industrial enterprises not only in China, but also in companies in many other countries all over the world. HUST is committed to educating students in science and technology, and in other areas of academia by advancing knowledge, extending vision, improving adaptability, and enhancing innovative awareness of the students. HUST actively promotes international cooperation and academic exchanges. It has established long-term cooperation with 59 universities and research institutes in more than 20 countries in Europe, America and the Asia-Pacific region. In the following years, HUST will extend and speed up international communication and cooperation with overseas universities to join the world of globalization.
